

Heatmap visualization showing the correlation matrix for 10 variables: mdvis, Incoins, idp, lpi, fmde, physlm, disea, hlthg, hlthf, and hlthp. The color scale ranges from -0.2 (dark blue) to 1.0 (dark red). The diagonal elements are all 1.0 (dark red). The matrix is symmetric. Notable correlations include a strong positive correlation between mdvis and Incoins (approx. 0.9), and a strong negative correlation between Incoins and idp (approx. -0.15).
