

Heatmap visualization showing the correlation matrix for ten variables: mdvis, Incoins, idp, lpi, fmde, physlm, disea, hlthg, hlthf, and hlthp. The color scale ranges from -0.2 (dark blue) to 1.0 (dark red). The matrix is symmetric, with the diagonal elements all equal to 1.0. The variables are ordered as follows: mdvis, Incoins, idp, lpi, fmde, physlm, disea, hlthg, hlthf, and hlthp. The heatmap shows strong positive correlations (red/orange) between mdvis and Incoins, Incoins and idp, idp and lpi, lpi and fmde, fmde and physlm, physlm and disea, disea and hlthg, hlthg and hlthf, hlthf and hlthp, and hlthp and hlthg. There are also some moderate positive correlations (light blue) between mdvis and lpi, mdvis and physlm, mdvis and disea, mdvis and hlthg, mdvis and hlthf, mdvis and hlthp, Incoins and physlm, Incoins and disea, Incoins and hlthg, Incoins and hlthf, Incoins and hlthp, idp and physlm, idp and disea, idp and hlthg, idp and hlthf, idp and hlthp, lpi and physlm, lpi and disea, lpi and hlthg, lpi and hlthf, lpi and hlthp, fmde and disea, fmde and hlthg, fmde and hlthf, fmde and hlthp, physlm and hlthg, physlm and hlthf, physlm and hlthp, disea and hlthg, disea and hlthf, disea and hlthp, hlthg and hlthf, hlthg and hlthp, hlthf and hlthp, and hlthp and hlthg. There are also some moderate negative correlations (dark blue) between Incoins and lpi, idp and fmde, and hlthg and hlthp.
