

Heatmap showing the correlation matrix for ten variables: mdvis, lncoins, idp, lpi, fmde, physlm, disea, hlthg, hlthf, and hlthp. The color scale ranges from -0.2 (dark blue) to 1.0 (dark red). The diagonal elements are all 1.0 (dark red). The off-diagonal elements show varying degrees of correlation, with some strong positive correlations (e.g., mdvis and lncoins, lncoins and idp, lncoins and lpi, lncoins and fmde, lncoins and disea, lncoins and hlthg, lncoins and hlthf, lncoins and hlthp) and some strong negative correlations (e.g., idp and lpi, idp and fmde, lpi and fmde, fmde and disea, disea and hlthg, hlthg and hlthf, hlthf and hlthp).
